

MATRIX GPO: SUPPORTING THE COMMUNITY-BASED PHYSICIAN

Did You Know?

Matrix GPO serves member practices across all 50 states, with a 54% increase in membership from 2019 to 2023.

Offering Valuable Tools to Support Your Practice

Matrix GPO offers solutions tailored to your unique needs.

01 | The Power of the GPO

A group purchasing organization (GPO) is an entity that helps healthcare providers realize savings and efficiencies by aggregating purchasing volume and using that leverage to negotiate discounts with manufacturers, distributors and other vendors.

Matrix GPO was designed with the intentional goal of supporting the long-term viability of the community-based physician. The services provided through Matrix GPO afford its members a range of practice resources and access to competitive pricing across a broad portfolio of specialty pharmaceuticals.

02 | Matrix GPO Member Benefits

Matrix GPO harnesses the purchasing strength of its members collectively to offer quality products and services at affordable rates that support independent physicians and clinics who serve patients at the local and regional levels. Matrix GPO assists today's healthcare providers through:

- Extensive pharmaceutical and biopharmaceutical contract access
- Drug purchasing and supply chain monitoring
- Inventory control and management solutions
- Customized reporting tools
- Practice management services

03 | The Matrix GPO Advantage

GPO contract acquisition pricing for branded and generic drugs in particular offers members significant savings opportunities through the Matrix GPO network of pharmaceutical manufacturer relationships.

Matrix GPO is also uniquely positioned to partner with other national group purchasing organizations. When desired, Matrix GPO can supplement the existing product portfolio of a national GPO to strengthen the overall product offering and extend the service capabilities for their members.

Matrix GPO membership offers a variety of programs and products through relationships with a number of organizations and businesses. These trade relationships are designed to afford members access to a diverse portfolio of Service Providers, with access to services such as telehealth and telemedicine, total account management, online ordering and more.
