Did You Know?
About 37 million U.S. adults are estimated to have chronic kidney disease, and most are undiagnosed.

Providing Savings Without Sacrificing Value

In the United States, diabetes and high blood pressure are the leading causes of kidney failure.

Every 24 hours, 360 people begin dialysis treatment for kidney failure. Matrix GPO understands the increased demand placed on nephrologists and was designed with the intentional goal of supporting the long-term viability of the community-based physician. The services provided through Matrix GPO offer its members a range of practice resources and access to competitive pricing across a broad portfolio of specialty pharmaceuticals. As a provider-focused, multi-disciplinary GPO, Matrix GPO membership spans a variety of disease-state specialties.

02 | Negotiated Savings and More

Due to the scope of product requirements for each specialty, Matrix GPO has forged a network of pharmaceutical manufacturer relationships to provide contract acquisition pricing for the branded and generic drugs that are essential to your practice.
