

TELEHEALTH AND PATIENT ENGAGEMENT SOLUTIONS

Did You Know?

It is estimated that 25-30% of all medical visits in the United States will be conducted via telemedicine by the end of 2026.

Providing Savings Without Sacrificing Value

Matrix GPO is a group purchasing organization for community-based physicians.

01 | Integrated Telehealth

Telehealth has become a critical component of the healthcare industry as practices seek to maintain patient capacity while controlling costs and engaging patients in the digital age. Capabilities within telehealth have expanded and will continue to grow to meet the needs of both patients and providers. Matrix GPO offers your practice telehealth solutions through our partners to increase patient engagement and streamline a new, patient-led workflow.

02 | Benefits

With telehealth services, virtual visits are quicker, decrease costs and allow for a larger patient reach. Telehealth also enables practices to better assess overhead, reduce manual data entry, and review inefficiencies. Fully automated in-person patient experience and advanced virtual visit tools simplify clinical assessments. These solutions offer opportunities to improve the financial health of your practice while enhancing productivity.

03 | Features

Unique features are important to growing solutions, and Matrix GPO and our partners offer exceptional options to best serve your practice. Below are some features within the Matrix GPO service provider telehealth solution:

- HIPAA-compliant telemedicine ensures you and your patients are always protected
- Patient scheduling access allows patients to schedule or modify their appointments, relieving employee workload
- Group video and scheduling provide no-hassle family appointments
- Patient appointment reminders and notifications minimize no-show patients
- Digital Forms can be completed across various devices for convenience and ease of use
- Enhanced virtual waiting room offers an innovative patient experience
- EHR and PMS integration capabilities allow for seamless patient profile management
