

REGULATORY COMPLIANCE SERVICES

Did You Know?

In 2017 over 3 million healthcare records were exposed or stolen in data breaches

Providing Compliance Solutions

54% of Patients are Likely or Very Likely to Change Doctors after Their Data Has Been Breached

01 | OSHA & HIPAA

Federal compliance is critical to everyday operations in any practice, so it is important to take all necessary precautions in order to remain in compliance on any OSHA or HIPAA regulations. Services are available that assess current policy and office standards in order to determine practice compliance. Annual risk assessments and tailored policies will allow for uniform compliance efforts and ensure the safety of your practice, your employees, and your patients.

Training for compliance is an important part of any physician's office. There are services available that can assist in the facilitation, tracking and monitoring of compliance training. Easily complete and assess compliance reviews, to-do lists, employee completion tracking and monitoring all in one place. With a cloud based system that can safely manage all your OSHA and HIPAA compliance needs it is simple and easy to remain in regulation with reminders and document management.

02 | Healthcare Billing Compliance

Avoid incorrect or fraudulent claims with an assisted billing compliance program that can support your entire practice. Services to prevent Healthcare Billing issues can save your practice time and money, by creating effective and efficient accuracy in your office's billing practices. Oversee your relationship with your payers and vendors in one easily managed and secure program.

03 | Simple Approach

Regulatory Compliance services are based off of the Seven Compliance Program Components. It is easy to stay compliant by relying on a system utilizing these seven essential elements:

- Standards and Procedures
- Compliance Committee/Oversight
- Education and Training
- Monitoring and Auditing
- Reporting
- Enforcement and Discipline
- Response and Prevention

These seven factors implemented together create a well-organized and balanced system that ensures all aspects of compliance is adhered to.
